

Strategic priorities:

1. Renewable Energy Sources:
 - ❖ *Mini hydro power projects : regulatory aspects – IPP, PPA / suppliers / EIA / mini-grids / low cost rural electrification standards*
 - ❖ *Bioenergy (liquid biofuels and cogeneration) : harmonization / case studies / training / technical know-how / suppliers / CDM*
 - ❖ *harmonization of standards for biofuels and biofuel vehicles and machines*
 - ❖ *Wind energy : legal / regulatory aspects / technical know-how / EIA*
 - ❖ *PV systems : Standards / applications cross-sectoral / rural electrification*
2. Financing schemes, funds raising and conditions to be met
 1. Banking institutions – lending / risk
3. Legal and Regulatory Frameworks – towards harmonization
4. Energy efficiency in the built-environment
5. Kyoto Protocol Mechanisms : CDM experiences – regional information sharing / Regional Emission Trading Schemes
6. Environmental and Social Impact Assessments: ensuring safeguard of the environment in energy practices/ waste to energy – waste
