

ABCDE : Proposed Structure

Benjamin S Austria, PhD

Executive Director

**Centre of Excellence for Sustainable Energy in
Southeast Asia**

Board of Directors

- **Consist of Full Members who come from energy related organizations and enterprises**
- **Policy making body and main governing body of the Council but it is not clear how these functions are to be carried out in practice**

Advisory Board and Working Groups

- **The Advisory Board supervises the Working Groups**
- **The Working Groups formulates ABCDE's actions and policy positions**
- **It is not clear how the members of these Board and Groups are selected**

Recommendations

- **Full Members be the main body of the Council, entitled to vote on:**
 - **who will constitute the Advisory Board/Steering Committee**
 - **recommendations on policy positions developed by the *Working Groups* and the *Advisory Board***
- **Advisory Board sets up and supervises the Working Groups**

Additional Thoughts

- **Are there not already existing bodies which could be nurtured to address the concerns cited as justifications for setting up the Council?**
- **This may be a more cost-effective approach which would optimize the use of and build on existing resources.**
- **This would also reduce the time needed to address the pressing concerns to promote and develop sustainable energy.**

THANK YOU
